

## WCF

产品的特征和优点:

WCF联轴器开发用于克服许多扭转问题与车辆和工业动力传动系统相关系统。这些减震器可延长设备寿命通过防止扭转振动，冲击和错位。

Features and advantages :

WCF have been developed to overcome numerous torsional problems associated with vehicular and industrial driveline systems. These Dampers increase equipment lifeby protecting against torsional vibration, shock and misalignment.
